The statements contained herein are based upon information believed to be reliable, but are not guaranteed to be complete or accurate. this memorandum is for information only and does not constitute an offer to sell or a solicitation to buy the securities referred to herein.

Alder Resources Ltd (ALR-V) is a TSX venture company which is focused on gold exploration in the Canadian Creek area of the Yukon Territory in Northwestern Canada. Our property of focus is approximately 11,860 acres of prospective gold, copper, and molybdenum. It is located 50km southeast of the Underworld Resources Inc (UW-V) owned "White Gold project" and 25km southeast of the Kaminak Gold Corp's (KAM-V) "Coffee property". These two projects sparked the largest land rush in the Yukon in years and the newly recognized area has been named the White Gold District .

Alder's exploration program is managed by its geological consultants Mincord Exploration Consultants Ltd. The work will be done pursuant to an NI 43-101 report dated July 27, 2009. This team of geologists has worked on this project since 1993 with expenditures of \$2m. The current exploration program will be two-pronged. We plan to start by testing a gold-arsenic anomaly which bears a similar signature to the geology found at the recent "White Gold" discovery by Underworld Resources. We also plan to continue exploring the copper-gold-moly targets on our property which lie adjacent to the large 900 million tonne reserve (Casino Project) of copper-gold owned by Western Copper Corp.
